Extension Rules	Natural Gas
Continued from Sheet No. G11.01.	
<p>C. The following values shall be used to determine the estimated costs for gas main extensions:</p> <p>R = Nominal gas main diameter: 2" or less: \$7.58 per foot >2": Estimated cost in the Company's sole discretion.</p>	
<p>D. If more than one customer requests a gas main extension, any required advance payment for gas main will normally be apportioned equally among the customers to be connected. If such apportionment would be inequitable, other factors, such as relative consumption and/or location of customers along the gas main extension, shall be considered.</p>	
<p>E. A gas main extension shall normally be located along the most direct and practical route in the public right-of-way from the nearest existing distribution gas main adequate to serve the customer's forecasted load to a point in the right-of-way on which the structure fronts, directly opposite the meter location. Both the main and meter locations will be established by Company standards, in the Company's sole discretion.</p>	
<p>F. The calculation of a customer's payment shall be restricted to a tract of property located on a final, state approved and recorded plat; or a building site approved by a municipality and on a municipal sewerage system or having an approved "State and County Permit Application for Private Domestic Sewerage Systems."</p>	
<p>G. All gas main extensions with estimated main costs, including all Special Facilities Charges except Winter Construction Charges, exceeding \$10,000 shall be reviewed by the Company for economic considerations. Gas service may be refused by the Company provided that the reasons and supporting analysis for such refusal are furnished to the customer and the Commission in writing. The customer shall be informed of their right to ask Commission Staff to review the refusal. Furthermore, all gas main extensions with gas main costs exceeding \$10,000, including all Special Facilities Charges except Winter Construction Charges, where the gas main cost, including all Special Facilities Charges except Winter Construction Charges, is greater than 150% of the allowance from Section 2.B. shall be charged a 32% tax gross-up on the required customer payment for gas main, exclusive of Winter Construction Charges. This tax gross-up is refundable during the Development Period.</p>
