

Crane Creek Wind Farm

The Crane Creek Wind Farm is located south of the Minnesota/Iowa state line near the community of Riceville, IA.

Crane Creek Wind Farm

Power Capacity of each Turbine
1.5 Megawatts at 32 mph

Number of Turbines
66

Total Installed Capacity
99 Megawatts

Estimated Annual Energy Production
330,000,000 kilowatt-hours

Estimated Annual Energy Equivalent*
40,000 households

Site Information

Land Area: 1/4 acre per turbine
Average wind speed at hub height:
17.7 mph

Project Developer
enXco Development

Turbine Manufacturer
General Electric

Date of Completion
December 23, 2009

*Based on a 38% capacity factor.
