

ATTACHMENT A

GENERATOR INTERCONNECTION APPLICATION

FOR ALL INVERTER BASED PROJECTS WITH AGGREGATE GENERATOR OUTPUT 20 kW OR LESS

Electric Utility Contact Informatio	n	For office use only
Corey Kuchta		Application No
Wisconsin Public Service		Date & Time Application Received
1717 10th Ave.		
Menominee, MI 49858		
906-863-4319		
corey.kuchta@wisconsinpublicservice.	com	
Customer / J	Account Information	
Electric Utility Customer Information: (As shown on utility	y bill)	
Customer Name (Last, First, Middle):		
Customer Mailing Address:		
Customer Phone Number:		
Customer E-Mail Address: (optional)		
Electric Service Account #		
Electric Service Meter Number:		
Generation Sy	stem Site Information	
Physical Site Service Address (if not Billing Address):		
Attached Site Plan:	Page #	
Attached Site Plan: Attached Electrical One-Line Drawing:	Page # Page #	
Attached Site Plan: Attached Electrical One-Line Drawing:	Page # Page #	
Attached Electrical One-Line Drawing:	Page #	
Attached Electrical One-Line Drawing:		
Attached Electrical One-Line Drawing: Generation System	Page #	
Attached Electrical One-Line Drawing: Generation System System Type (Solar, Wind, Biomass, Fuel Cell, etc):	Page #	
Attached Electrical One-Line Drawing: Generation System System Type (Solar, Wind, Biomass, Fuel Cell, etc): Generator Type (Inverter):	Page #	kW
Attached Electrical One-Line Drawing: Generation System System Type (Solar, Wind, Biomass, Fuel Cell, etc):	Page #	kW kW
Attached Electrical One-Line Drawing: Generation System System Type (Solar, Wind, Biomass, Fuel Cell, etc): Generator Type (Inverter): Total Generator Nameplate DC Rating (Solar Only):	Page #	
Attached Electrical One-Line Drawing: Generation System System Type (Solar, Wind, Biomass, Fuel Cell, etc): Generator Type (Inverter): Total Generator Nameplate DC Rating (Solar Only): Total Generator Nameplate AC Rating:	Page #	kW
Attached Electrical One-Line Drawing: Generation System System Type (Solar, Wind, Biomass, Fuel Cell, etc): Generator Type (Inverter): Total Generator Nameplate DC Rating (Solar Only): Total Generator Nameplate AC Rating: Generator AC Output Voltage:	Page #	kW
Attached Electrical One-Line Drawing: Generation System System Type (Solar, Wind, Biomass, Fuel Cell, etc): Generator Type (Inverter): Total Generator Nameplate DC Rating (Solar Only): Total Generator Nameplate AC Rating: Generator AC Output Voltage: Generator Wiring Configuration (Single Phase, Three Phase):	Page #	kW V
Attached Electrical One-Line Drawing: Generation System System Type (Solar, Wind, Biomass, Fuel Cell, etc): Generator Type (Inverter): Total Generator Nameplate DC Rating (Solar Only): Total Generator Nameplate AC Rating: Generator AC Output Voltage: Generator Wiring Configuration (Single Phase, Three Phase): Expected Annual Output in Kilowatthours	Page # Manufacturer Information	kW V
Attached Electrical One-Line Drawing: Generation System System Type (Solar, Wind, Biomass, Fuel Cell, etc): Generator Type (Inverter): Total Generator Nameplate DC Rating (Solar Only): Total Generator Nameplate AC Rating: Generator AC Output Voltage: Generator Wiring Configuration (Single Phase, Three Phase): Expected Annual Output in Kilowatthours Is the Inverter tested to IEEE1547.1?	Page # Manufacturer Information	kW V
Attached Electrical One-Line Drawing: Generation System System Type (Solar, Wind, Biomass, Fuel Cell, etc): Generator Type (Inverter): Total Generator Nameplate DC Rating (Solar Only): Total Generator Nameplate AC Rating: Generator AC Output Voltage: Generator Wiring Configuration (Single Phase, Three Phase): Expected Annual Output in Kilowatthours Is the Inverter tested to IEEE1547.1? Inverter Based Systems:	Page # Manufacturer Information	kW V
Attached Electrical One-Line Drawing: Generation System System Type (Solar, Wind, Biomass, Fuel Cell, etc): Generator Type (Inverter): Total Generator Nameplate DC Rating (Solar Only): Total Generator Nameplate AC Rating: Generator AC Output Voltage: Generator Wiring Configuration (Single Phase, Three Phase): Expected Annual Output in Kilowatthours Is the Inverter tested to IEEE1547.1? Inverter Based Systems: Manufacturer	Page # Manufacturer Information	kW V

GENERATOR INTERCONNECTION APPLICATION

FOR ALL INVERTER BASED PROJECTS WITH AGGREGATE GENERATOR OUTPUT 20 kW OR LESS

Installation Information

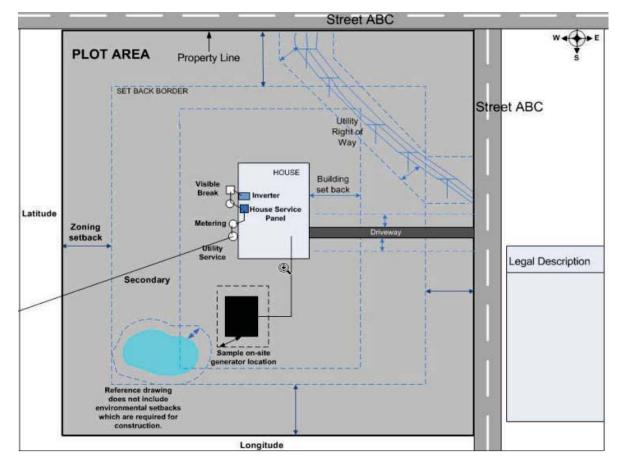

Project Single Point of Contact: (Electric Util	lity Customer, Developer, or other)
Name:	
Company (If Applicable):	
Phone Number:	
E-Mail Address:	
Requested In Service Date:	
Contractor (Name of Firm or Self):	
Contractor Name (Last, First, MI):	
Contractor Phone #:	
Contractor E-Mail:	
Custo	omer and Contractor Signature and Fees
Attach \$75 Interconnection Application Fee	
	(Check # / Money Order #)
	lete application with Application Fee to Electric Utility Contact) the information provided in this Application Form is complete and correct.
Customer Signature	Contractor Signature (if applicable)

Note: Refer to the applicable "Michigan Electric Utility Generator Interconnection Procedures" for a detailed explanation of the Interconnection Process and Technical Requirements.

Sample Site Plan - Provided for Reference Only

Customer Name:	
Customer Address:	
Site Plan Prepared By:	
Date:	

Note: Legible hand drawn site plans are acceptable

SAMPLE ONE-LINE DRAWING

Customer Name:	
Customer Address:	
Site Plan Prepared By:	
Date:	

Note: The one-line drawing below is a general drawing for Net Metering Customer

Note: Legible hand drawn site plans are acceptable
