**Per therm gas cost rate may change each month.

***Residential Gas Transportation Service is subject to rate schedule GT.

Other Services and Programs

Backup services, balancing services, nominated firm, contracted services and others may be available. Please contact WPS for information regarding eligibility and availability.

What You Can Do to Manage Costs

At WPS, we realize that energy costs make up a significant portion of your monthly budget. For this reason, we are committed to helping our customers manage their energy use and costs. When you visit **Energy-Saving Tools & Ideas** and **All About My Bill** at wisconsinpublicservice.com, you'll find a wealth of tools and information to help you learn about your energy use and how to better manage it. You can also visit focusonenergy.com for information on energy-saving programs and rebates offered through Focus on Energy.

For More Information

If you have any questions about the rate changes, please contact 24-Hour Customer Service at **800-450-7260**.

IMPORTANT Information About Your Rates

Customers will see no increase in electric rates and a slight decrease in natural gas rates.

On December 30, 2008, the Public Service Commission of Wisconsin (the Commission) set electric and natural gas rates for Wisconsin Public Service. Overall, retail electric rates will remain at their current level, while natural gas rates will decrease 0.44% beginning January 1, 2009. Although the net effect on customers will vary, an average natural gas customer using 900 therms of natural gas annually will see a decrease of approximately \$0.63 per month.

With projected higher fuel costs as a major driver, WPS had originally requested to raise electric rates by 7.75%. However, the significant drop in fuel costs has allowed WPS to avoid increasing electric rates for its customers.

Also, the Commission approved WPS's request to conduct a pilot program that "decouples" WPS's revenues from its sales for both electric and gas service. The new rate structure — which includes decreased fixed charges and increased per therm and per kilowatt-hour rates — provides WPS with stable revenues regardless of changes in energy use. This rate structure provides customers with incentives to participate in energy conservation efforts. WPS will also design and test several innovative options for electric customers later in 2009.

Residential Electric and Natural Gas Service Rates

Here are the residential rates, effective January 1, 2009. Most of our residential customers have Standard Service.

Electric Service Rates

Standard Service	
Customer Charge	
Single Phase (Urban)	\$5.70/mo.
