

Wisconsin Public Service

REQUEST FOR UTILITY COST ESTIMATES

If you are looking to locate in the WPS service territory or considering an expansion, [contact us](#) for a utility cost estimate. Several factors can influence your costs.

Provide prospective building/site address if applicable.

Customer Information:

ELECTRIC

What is the annual electric consumption (kWh)?

What is the expected demand (kW)?

What is the desired electric service?

What would be the hours of operation? 24/7, 1 shift, 2 shifts?

Can the service be interrupted and if so, by what percentage?

GAS

What is the estimated annual gas usage (CCF), or if seasonal, what is the gas usage by month?

Is the gas load seasonal? In other words, is gas usage flat because there is a continuous process load or is it seasonal because the majority of gas usage is for space heating. If a customer knows their load is seasonal due to space heating, we can apply a factor to the annual usage value to estimate the monthly usage.

What is the maximum daily usage?

What is the required delivery pressure?

Can the service be interrupted and if so, by what percentage?
